Our awardwinning customer service department provides the same information, goods and services offered on our website. Our customer service hours are Monday through Friday between the hours of 600 am to 600 pm Pacific Time, and Saturday between the hours of 700 am to 400 pm Pacific Time. The MFP delivers highquality documents without the sacrifice of time. The digital technology and features enable effective management controls that optimize the performance ideal for businesses ranging from small to enterprise standards. The Image server operates on 2.1 Giga Bytes of memory, and the maximum number of mailboxes is 100. Users can print up to 999 multiple copies. An automatic trayless duplexing feature that takes up to five minutes or less to warm up is available for the digital imaging system. The digital features of copying and printing only requires a large document be scanned once, instead of multiple times trying to get the scan right. The halftone utilizes 256 gradations of gray. The print and copyrates for Lettersized documents averages 55 per minute with the first copytime taking less than six seconds from the Automatic Document Feeder. Magnification can be adjusted in increments of 1%; the minimum reduction is 25% and the maximum magnification is 400%. There are preset reductions from 78%, 73%, 64%, 50%, and 25%; The preset enlargements are 400%, 200%, 129%, and 121%. Originals acceptable for copying and

printing are books, sheets, and threedimensional items. The maximumsized document is 11 x 17 inches. As far as paper capacity goes, there are two 550 sheettrays and two 1,500 sheettrays; the manual bypass holds 50 sheets. The maximum sheet capacity of 7,650 sheets is more than enough for everyday print jobs. The optional D1Stapler Stacker Finisher holds up to 250 sheets for the top tray and 2,000 sheets for the lower tray; the lower tray holds Lettersized documents.

http://danijel-prevod.com/images/bss-blu-100-manual.pdf

The stapling capacity is 50 sheets with stapling positions located on the topcorner or sidemargin of documents. The SaddleStitch tray will hold up to 1,000 sheets on the top tray and 2,000 sheets on the lower tray for Lettersized documents. The SaddleStitch tray holds up to 900 sheets; the stapling positions are topcorner, saddlestitch, and sidemargin. Three holes can be punched in the documents on the leftmargin. The dimensional measures of the digital imaging device are 31 inches in depth, 45 inches in height, and 30 inches in width. The TokenRing topology permits a single user only to use token in the network; This avoids any collision of data from multiple nodes in a network. The digital copier facilitates its own IP address. The networkability permits the printer to be used in Unix, NT, or Novell servers. Some reviewers have reported problems with the document feeder. Digital copying feature may not look as generous with its shading and contrast. Any node using the printer will have to install the printer drivers, this is not so much as a con but does waste a little time during the installation process. The size of the Canon ImageRunner 550 makes it unsuitable for a desktop or credenza. It weighs an astonishing 553 pounds; that is half the weight of a small car. The GPR7 drum yields 5,000,000 impressions or pages. The black toner is used to introduce the powder to create a xerographic image. The drum is used to convey an image to a document. The toner will stick to the drum and then project an image to a sheet. The host machine is constructed by following 6 functional system blocks; Original Exposure and Feed System, Controller System, Laser Control System, Image Formation System, Fixing System and Pickup Feed System.
